NAVIGATIONS- & KOMMUNIKATIONSSYSTEME

Horizon Suite

Keeps an eye on everything! With the Horizon Web Portal and the Horizon Go app, we offer you an additional software suite with real time information that will help you to plan and monitor your vehicles and routes optimally.

The Horizon Go App will allow the driver to be a participating partner in the dispatching and HOS process, if you wish. The user-friendly display will give you and your driver a quick overview of loading, route, location and much more.

BENEFITS

- Detailed real-time information - shipment details
- Professional and efficient rout planning
- Better transparency through the involvement of the driver, customer, supplier - you decide who
- All security features of *Sat*WEB

NEW 4G and LTE

For even more security! A better network coverage, faster transmission and very stable connections even at high speeds, e.g. when you are on the move, guarantee a reliable and safe network to call for help in hazardous situations.

Whether personal security or tracking your goods - the *Sat*FONE.smart as well as our *Sat*MOS® systems are now 4G / LTE capable.

*Sat*TRAC.lommy

Are you looking for a reliable solution for locating your containers or swap bodies? This is our solution for you:

The new *Sat*TRAC family member - undercover. The *Sat*TRAC.lommy is a battery powered tracking device, camouflaged in a ventilation cover for containers or swap bodies.

This energy-saving lightweight is hidden on your container and informs you whether your container is still in the right place, has been moved or has even crossed a national border, on a daily basis.
