

## SatFONE.watch

Intelligent smart watch with GPS tracking

This smartwatch combines the proven security features with health monitoring, packaged in a chic design. In addition to GPS tracking, SOS alarm, drop alarm, geo-fence alarm, two-way communication and Bluetooth, the owner can keep an eye on his health at the same time.

In case of emergency the user can activate and SOS notice, sending an alert to your chosen device showing the user is in some kind of distress.

If the user leaves the designated safe area, an alert will be sent to your desired device, alerting you to the potential danger.
