OUR SOLUTION FOR YOU

PERSON SECURITY LOCATION OF PERSONS

Protecting people is important to us - especially those who work in hazardous places or work alone.

With the systems of the *SatFONE*-family you will be able to protect your drivers and employees in their daily work. With the possibility of initiating a manual alarm, or triggering an automatic alarm when falling or fainting, the monitoring center will be informed immediately in case of a hazardous situation. No matter where you are. All our systems are ready to use in worldwide network.

SatFONE.smart

The mobile panic button incl. voice communication

VEHICLE PROTECTION TRANSPORT SAFETY

With us your employees, vehicles and cargo will be safe on the planned route.

In the market of securing and monitoring semi-trailers/ trailers you will recognize our high standards.

Our *SatMOS*®-family is one of the largest, most flexible and secure in its field. Not only because of the intelligent and fail-safe modules, but also because of the special services and functions, which can be customized by request.

SatMOS®.secure

- Intelligent alarm system for semi-trailers
- Door contact, light and motion sensors for intrusion alarm
- Additional sensors for monitoring the temperature and the diesel-tank of the cooling unit
- Alarm siren and remote control via *SatFONE.smart*
- High security with the electronic lockig solution *SatLOCK.frame*

YOUR BENEFITS

- Detection and report of diesel theft
- Variety of self-developed alarm sensors
- Inputs/ outputs for external extensions
- Worldwide route monitoring with remote control
- full telematics functions (logbook, tank recording, ...)

WE CAN OFFER MORE

- We can track nearly everything
- All our devices are ready to use according to all GSM standards
