WORKER SAFETY

CARGO SECURITY

OUR CORE BUSINESS ENCOMPASSES SPECIALIZED AND CUSTOM SECURITY SOLUTIONS DELIVERING OPTIMAL CARGO PROTECTION.

Undeniably transport crime is booming and criminals are striking more often and with more violence to get their hands on the goods. Solving this security problem by offering hardware solutions to secure cargo is one of our core aims.

We provide you with the right security system according to your requirements, while taking into account the type of vehicle or cargo you need to secure and the level of security you want to achieve. From mobile single solutions to inbuilt hardware to meet the highest security standards such as the latest TAPA TSR1 requirements.

Real-Time Tracking Technology

GPS IoT devices can be attached to almost any vehicle or object to provide real-time location updates and help to reduce the risk of theft or loss.

Storage Conditions Monitoring

E.g. temperature monitoring for cold storage and transport of products like food or certain pharmaceuticals.

High Value Transport Security

Especially for high-value and safety-sensitive goods it is absolutely essential, to prevent theft, damage or loss. Here tailor-made safety concepts are crucial for success.

From single mechanical locks to inbuilt solid frames and anti-break-in loops in sidewalls: find out more about our security devices on www.satmars.de.

Lone workers face the same hazards at work as anyone else, but there is a greater risk of these hazards causing harm as they may not have anyone to help or support them in case of an emergency.

Our SatFONE.family trackers provide proactive, reactive and emergency 24/7 support for people wherever they are in the world, using 4G network.

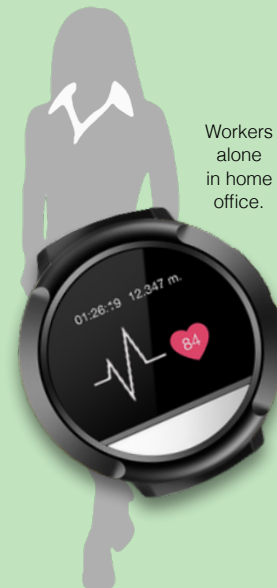

Nurse or pharmacist on emergency duty.

Lone workers at a construction site.

Working in hazardous environment.

Workers alone in home office.

A PERSONAL ALERT STRENGTHENS YOUR SAFETY IN RISKY AND / OR THREATENING SITUATIONS ESPECIALLY WHEN YOU ARE ALONE.
