

SatFONE.pro

The handy GPS tracker with SOS function.

The SatFONE.pro is a mobile 4G capable tracking unit with a SOS button for emergency rescue, a fall detection sensor and two-way voice communication. Designed to protect elderly and lone workers it will alarm the security center in the case of an emergency. Thanks to GPS and motion sensors, the security center is alerted if the owner has fallen, has not moved for a long time or has left a defined zone, thus enabling a quick response and action. Thanks to the intelligent docking station with Bluetooth function, even indoors.

Technical Data

- Size : 62mm x 47mm x 17mm
- Weight: 53 g
- Life: approx. 48 hours with daily use
- Rain and splash proof (IPX7)

Features

- Realtime tracking via GPRS, 4G network
- Support AGPS, get GPS signal fast
- 3D G-sensor for motion alarm, shock alarm and power management
- Two-way talking conversation / Voice call on alarm by SOS button or fall sensor
- 1MB Memory installed
- SOS button for emergency rescue
- Falling Down Alarm
- Geo-Fence Alarm
- Movement Alarm
- Low Battery Alert
- Speeding Alert
- Micro-SIM card
- Docking station with bluetooth allowing indoor tracking (Mesh Network Technology)
- Charging with docking station, for mobile usage with Micro-USB charger

Including

- 220V Home Charger Docking Station with USB cable
- 3.7V, 950mAh (Li-Polymer) battery installed
- Lanyard and Keyring holder
- Standard color: white
