

Fully-fledged compartment protection for Light Commercial Vehicles

Protect your Light Commercial Vehicle and its load with our SatLOCK.soft.

The SatLOCK.soft will lock and secure the door of your vehicle automatically by closing the door, by using a keypad or by your telematic system, depending on your wish and requirements. Its titanium steel bolt which additionally locks the door will prevent access by unauthorized individuals. A simple but extremely effective cargo protection.

Open Door Alert

SatSENS.door

Movement Alert

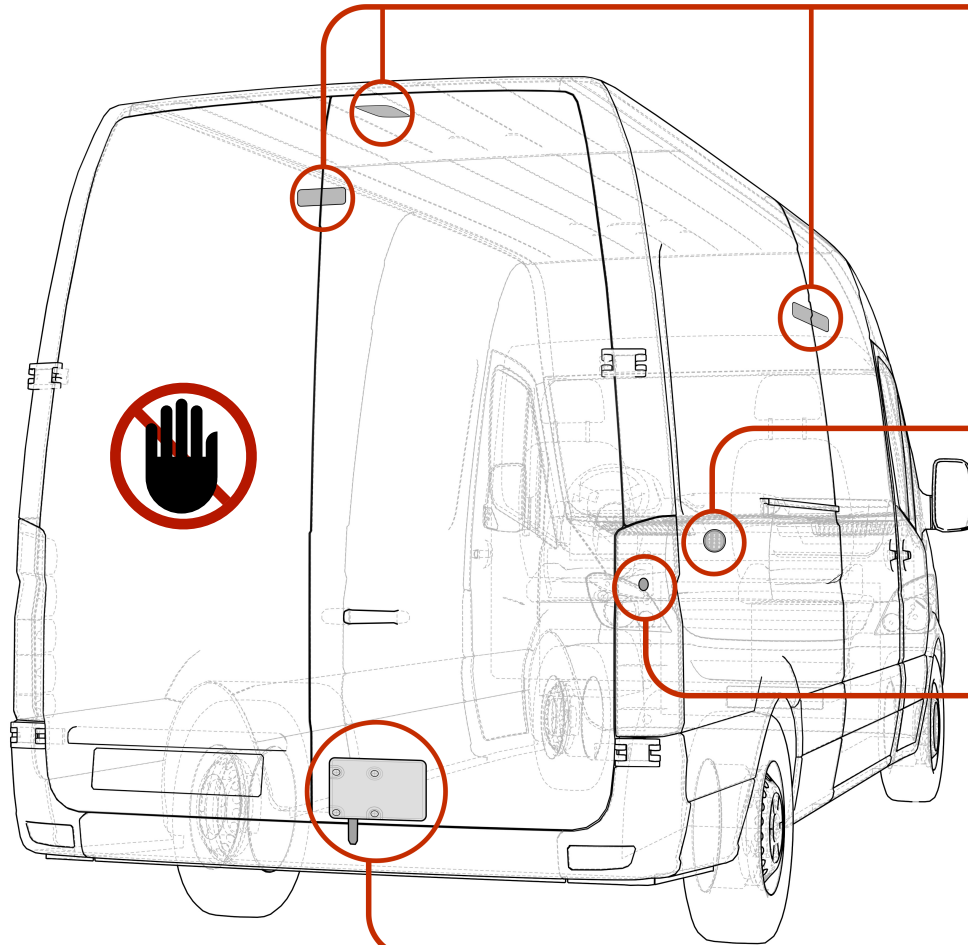

SatSENS.4d

Emergency Alarm

SatSENS.alert

Expand the security level by adding supplementary sensor technology.

Open the SatLOCK.soft with a PIN on a keypad or send a SMS command through your telematic system.

Call for help by using an alarm button in the case of an emergency.

With the titanium locking bolt the door is locked tightly and securely.
